

EO KIDS UNIVERSITY

Dear Friends,

*I believe our parents are part of an organization called **Entrepreneurs Organization**. The very word itself, **Entrepreneur**, signifies being a go-getter and a trailblazer. So, why wait till we reach college to inculcate these skills! Join me at the **EO Kids University** to create, lead and innovate from the very first day itself. It promises to be a total neurotopia. The best part is that we get to live together for the duration of the **University** which is only three days. Let's make the most of it! Bring your pyjamas and I'll bring the chocolates.*

My aunts and uncles from Jaipur have arranged an action packed schedule with dynamic classes such as creative writing, intuitive problem solving, computer game design etc. By doing courses such as these, we will be able to expand our skill set outside the usual academic curriculum. Of course, we want to be able to make strong bonds as well and all the teamwork exercises that they have planned are aimed at doing just that. In addition, the icing on the cake for me are the exceptional sports facilities available under the aegis of world class coaches. I have been wanting to sharpen my backhand and this seems the perfect opportunity.

I remember something a wise man said, 'Oh, the places you'll go, today is your day! Your mountain is waiting, so get on your way!'

I can't wait to meet all my fellow junior EO-ers.

Love,

An excited Neuro-topia student
